

STELLA BRENNAN | the song remains the same

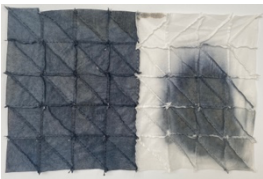

22 June – 23 July 2022

With an established practice spanning from the handmade to the highly mediated, Stella Brennan prises open history, its losses and possibilities, interrogating colonialism, industrialisation and computerisation. In *the song remains the same* we see material evidence of the depth and breadth of Brennan's thinking over the past two decades, works including interplanetary-style flybys of laptop packaging, video from a home-made subatomic particle detector and laser-cut army blankets.
